#### **Instructions:**

- Write your complete name on your copy.
- Answer all 6 questions below.
- Write your answers directly on the questionnaire.
- Show ALL your work to have full credit.
- Draw a square around your final answer.
- Return your copy when you're done or at the end of the 2h period.
- No electronic devices allowed during the exam.
- Scientific calculator allowed only (no graphical calculators).
- Turn off your cellphone(s) during the exam.
- Lecture notes and the textbook are not allowed during the exam.

The probability density function of a random variable X is given by

$$f_X(x) = \begin{cases} \frac{2}{\pi(1+x^2)} & -1 \le x \le 1\\ 0 & \text{elsewhere.} \end{cases}$$

Find the distribution function of  $f_X$ . You can take for granted that  $\int \frac{1}{1+x^2} dx = \arctan(x) + C$  and  $\arctan(-1) = -\pi/4$ .

Question 2 $(20)$	pts)
-------------------	------

A soft-drink machine can be regulated so that it discharges an average of  $\mu$  ounces per cup. If the ounces of fill are normally distributed with standard deviation of 0.3 ounce, give the setting for  $\mu$  so that 8-ounce cups will overflow only 1% of the time.

QUESTION 3 \_\_\_\_\_\_ (10 pts) Let (X,Y) denote the coordinates of a point chosen at random inside a unit circle whose center is at the origin. Their joint density probability function is

$$f_{X,Y}(x,y) = \begin{cases} 1/\pi & x^2 + y^2 \le 1\\ 0 & \text{elsewhere.} \end{cases}$$

Find  $P(X \leq Y)$ .

\_\_\_\_ (20 pts)

$$f_{X,Y}(x,y) = \begin{cases} 2 & 0 \le y \le x \le 1 \\ 0 & \text{elsewhere.} \end{cases}$$

Are X and Y independent?
